

Pollux Sideguards

07110

Construction

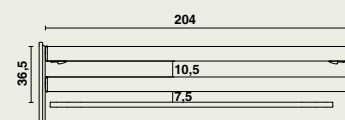

- The Pollux sideguards consist of two aluminum profile siderails.
- The siderails are standard surrounded with a wooden structure.
- The sideguards can be perfectly integrated in the bed design. The natural touch of the bed thus remains guaranteed.
- The lowerable siderails are integrated in the head and foot panel.
- The sideguards can only be lowered by using your both hands simultaneously.
- The locking mechanism has been developed to prevent the sideguards from being lowered unintentionally.
- The locking mechanism is situated on both ends of the upper siderail.
- The profiled siderails have an ergonomic grip design, so that they can be easily manipulated.
- A guaranteed distance between the two siderails makes sure that the Pollux sideguards comply with the strictest norms.
- In their lowest position, the sideguards are no obstacle when the patient wants to get out of the bed or has to be transferred, or when the bed has to be made up.
- The Pollux sideguards match perfectly with the sides of the bed.
- Measured from the mattress platform, the total height is 36,5 cm.

Dimension

07110 | Pollux sideguards

- height: 36,5 cm
- mattress thickness: max. 14 cm
