

WZC Sint-Lenaartshof

Sint-Lenaarts, Brecht (Belgium)

Sint-Lenaartshof is a vast residential nursing home campus in the midst of a green environment with a view of the waterway and within walking distance of the town centre of Sint-Lenaarts. Built on the former clay pits, the new campus consists of a residential nursing home with 110 rooms, as well as a centre with 10 rooms for short stays, a day care centre and 44 assisted living facilities.

In consultation with Archipro architects and Haelvoet, Sint-Lenaartshof has opted for a well-considered range of colours. Soft green and fiery red are the dominant colours, whereas a soft almond colour adds the finishing touch. The upholstery of the Domus seats and Lima chairs blends in perfectly with the stain of washed oak. The beds and bedside tables, too, were finished with the same wood colour.

Haelvoet is very proud of having participated in the interior process of this wonderful assisted living project and did its utmost best to create a homely atmosphere for both the residents and nursing staff.

Architect: Archipro architects (www.archipro.be)

Scope of the project : 110 rooms + cafeteria + communal areas

Date: Spring 2015
