

MAURO

Duo-line relax

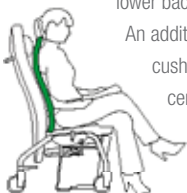

Mauro Duo-line relax chair

The Mauro Duo-line relax chair is a real blessing for the patient and nursing staff. Various accessories and features allow the chair to fit in a wide variety of healthcare environments.

01. SHAPE OF THE BACKREST

Comfort for everyone

The seat shell has been designed following the shape of the human spine (S-shape). It offers an exceptional support at the level of the lower back and the shoulders.

An additional neck support cushion is possible, but certainly not required.

02. RELAX MECHANISM

A blessing for the patient

Experience fewer pressure points on the body and improved blood circulation thanks to our patented 'zero gravity' (*) position, achieved through the Duo-line relax mechanism. This system allows individual adjustment of the backrest and legrest via two gas springs.

03. CENTRAL BRAKE

Mobile and flexible

The 2 castors at the back legs have central brakes and a directional lock.

04. TELESCOPIC LEGREST

Optimal support

The legrest is telescopic and makes sure that the lower legs are supported in the best possible way.

05. LOWERABLE ARMRESTS

Facilitate transfers

The lowerable armrests can be adjusted in 4 different positions. In their lowest position, the armrests are on the same level as the seat which facilitates patient transfers.

(*) *Zero gravity position*: this seat/lying position is based on NASA data. A neutral body position converts all muscle power into a biomedical balance. (Source: "From outer space to you", Omni, March 1994)

06. MODULARITY

According to your needs

The relax chair can be composed the way you want it. Various accessories make the chair more complete, such as a removable headrest, a dinner tray,...
